

REFORM

REMOTIVE APP

At Remotive, we pride ourselves not only on our high-quality service, but also on our transparent communication. To enhance this, we have developed the Remotive overhaul application which provides our customers with a clear view of our activities from the inspection phase through to the entire process, with the option to monitor the progress. We also offer templates and personalized forms to accommodate our users' working methods as much as possible. Every step of the maintenance and overhaul process is covered, reducing errors to an absolute minimum.

The forms are automatically converted afterwards into clear reports. Using the data obtained, we can identify common problems with certain machines and take the necessary steps to prevent them in the future. In this way, the Remotive app not only serves as a transparent communication tool towards our customers, but also complements our own quality control and service.

OUR MISSION

Thanks to our commitment to personal development and outstanding service, we guarantee the best quality for all your technical needs. Our team of highly trained professionals is dedicated to delivering honest and reliable service that tackles any technical challenge that comes your way and saves you precious production time.

“REMOTIVE, WE SAVE TIME”

ABOUT US

Remotive is a brand-independent overhaul company that puts honesty and transparency first. Our dream was born in 2015, driven by a passion for delivering the best possible service to our customers. We prioritize transparent communication both with our customers and our employees. We work together as a close-knit team, where each member can count on the other, and new friendships are formed. In our working environment, personal growth and individuality are highly valued. With a good working atmosphere and flexible work environment, we are able to guarantee excellent and fast service to each of our customers. At Remotive, we never compromise on quality. With a strong focus on safety and a commitment to putting quality first, we have become a respected name in the industry.

CREATING FORMS

Choice of existing templates or ability to customize forms.

ADDING IMAGES

Within the app, you can use your tablet's camera to add images to your forms. Afterwards, the forms are converted to a report in PDF that can be easily shared internally or externally.

EXTRA CONTROL

By following the indicated steps, the application guides you through the inspection or overhaul. Afterwards, the forms are automatically merged into a clear report; resulting in consistent reporting, higher quality control and time savings.

SMART DATA USE

Recording accurate data for each maintenance and overhaul allows for the identification and prevention of frequently occurring problems in the future.
